

FAASTeam presents:

Mid-Air Collision Avoidance

The airspace throughout central NJ can be busy. Several GA airports combined with military airports at Lakehurst and Joint Base McGuire encompass large areas throughout the state. Army, Navy, Air Force and Marine Corps, utilize McGuire and at any given time there can be a multitude of different aircraft moving out of or into the airspace. Major Kellie E. Kavanagh, Chief of Safety will be discussing scanning techniques, seeing and avoiding, airspace parameters and the ease of doing something that many pilots choose not to do: Requesting flight following from McGuire Approach. This presentation will be informative, timely and a worth while investment to you as a pilot. So register today.

Directions: Special Note: You will pass approach to RWY 24 when heading towards CAP building. Look to your right for approaching aircraft. When entering airport, enter gate on your right with unicom frequency.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASteam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
